

# Fact Sheet: West Riverside Recovery Roads Repairs

City of New Orleans  
Department of  
Public Works

## Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

## Project Facts:

**Phase I:** Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of \$55,200,000. The total cost of Phase I repairs completed in the West Riverside area totaled approximately \$364,000.

**Phase II:** The West Riverside Recovery Roads program will include multiple construction repair projects with an estimated value for roadway improvements that is approximately \$1,010,000. Design of the future road repairs is currently underway and is being closely coordinated with the Sewerage and Water Board of New Orleans. Construction is currently scheduled to begin in Q2 2016 and last through Q1 2021. Road resurfacing work will be limited in some areas of West Riverside.

## What to expect during construction:

Residents and businesses in the West Riverside area should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. The West Riverside engineering and design firm is yet All South Consulting Engineers. The construction contract is scheduled to be available for bid in Q1 2016.
